Project Developer

As a developer I created various Machine Learning Models using ML Algorithms (**Supervised and Unsupervised**) which includes Neural Networks. And also performed Data Analysis, Preprocessing to prepare data for model development using python. Moreover I Implemented various optimization techniques to improve model accuracy.

Projects

Potato Leaf Disease Prediction

I developed a Deep Learning model based on potato leaf disease prediction using Convolutional neural network (CNN). Also achieved 94% accuracy in classification of disease.

Design Your Environment

The main objective of this project is that user can select the features according to his needs and i have linked a Machine learning model to this project which predicts the price of the house based on city.
